---	---	--

COLLECTION

Collection from Caledonian Bulk Distribution, London EC1A 1BB, into the London consolidation centre. Delivery to EH1 1AA, Edinburgh. Three trunk hops.

TRUNK ITINERARY — A LARGE BLOCK RIDES ONLY THE MIDDLE HOP

PALLET LINE	PALLETS	WEIGHT / PALLET	JOINS TRUNK AT	LEAVES TRUNK AT
Retail display units, flat-packed	6	400 kg	London (origin)	Edinburgh (destination)
Seasonal stock, shrink-wrapped — bulk block	18	950 kg	Joins at Nottingham	Leaves at Leeds

Hop-by-hop the truck carries: London → Nottingham **6 pallets**; Nottingham → Leeds **24 pallets, 19,500 kg**; Leeds → Edinburgh **6 pallets**.
The booking totals 24 pallets, but no single hop carries the whole booking — and the middle hop is the only one anywhere near capacity.

CONSOLIDATED CARGO SUMMARY

ORIGIN COMPANY	MATERIAL / GOODS DESCRIPTION	L X W X D (CM)	LINE WEIGHT	QTY (UNITS)	PALLETS
Caledonian Bulk Distribution	Retail display units, flat-packed	120 x 100 x 150	16 kg/unit	150	6
Caledonian Bulk Distribution	Seasonal stock cartons, shrink-wrapped	120 x 100 x 160	12 kg/carton	1,425	18
Totals				1,575	24

Total pallets booked: 24. Total units: 1,575. Peak pallets on any one hop: 24 (Nottingham → Leeds). Collection and delivery legs each carry 6 pallets.

HANDLING NOTES

A three-hop trunk exceeds the default network hop ceiling of two. Quoted as-is, the engine refuses the route — “*Too many intermediate stops (2); the limit is 1.*” — until the trunk-hop limit is raised to three in the groupage routing configuration. This is deliberate: the ceiling is a configured commercial limit, not a hidden one.

One end-to-end line-haul rate applies to all 24 pallets regardless of the hop each rides; two calling points each add a flat handling fee. The eighteen-pallet block boards at Nottingham on freight collected by another run and alights at Leeds, so it never touches this booking's collection or delivery vehicle.
